[List Box]

Save Settings

5. Click the Icon to set it up
6. Username and Password is the same for the portal (<https://mypbxmanager.net>)
7. Extension: Your SIP ID. You can find this number on [mypbxmanager.net](https://mypbxmanager.net) under Features
8. CallerID is your phone number (with the 1 prefix)
9. Blacklist/Whitelist: Choose where this app will work. If you want it to work on all websites select “Blacklist” and leave the Domains list blank. If you only want it to work on certain sites use the “Whitelist” Feature and include the domains you wish to be able to use the app on. Blacklist allow you to enter sites that you want to ignore. That’s it!
