

Jivetel Chrome Plugin instructions.

1. Go to:

<https://chrome.google.com/webstore/detail/jivetel/cpcholaekimgaoaaiefejoebbohahpdh>

2. Add the extension to chrome.

3. You should notice the Jivetel Logo on the top right corner.

4. Click the Icon to set it up.

5. Select Jivetel in the System.

6. Username and Password is the same for the portal.

7. Extension: is your extension number with you domain
For example: 101@domain

8. CallerID is your phone number (with the 1 prefix)

9. Blacklist/Whitelist: Choose where this app will work. If you want it to work on all websites select “Blacklist” and leave the Domains list blank. If you only want it to work on certain sites use the “Whitelist” Feature and include the domains you wish to be able to use the app on. Blacklist allow you to enter sites that you want to ignore. That’s it!
